

Computer Science and Business Management graduate from Tel Aviv University, with a strong foundation in software engineering. I have completed a Full-Stack development program gaining experience in building end-to-end web applications, working with APIs, and developing scalable, user-focused solutions. In addition, i am starting a M.Sc in ML and Data Science at Reichman University in October 2026.

Education

Computer science and Management

Oct 2020 to Jul 2025

Tel Aviv University, Tel Aviv

GPA - 81

Algorithms (89), Operating Systems (88), Discrete Mathematics (82), Introduction To Computer Science (83), Software Project (90), Topics In Software Engineering (92), Computational Models (81), Data security And Digital Services (95), Database Systems (89).

MSc Machine Learning and Data Science

Oct 2026

Reichman University, Herzliyya

Expanding my expertise in Machine Learning, Artificial Intelligence, Data Science, and advanced analytics, building upon my Computer Science and Management background.

Areas of Expertise

- | | | | |
|----------|--------|--------------|--------------|
| • Python | • java | • SQL | • C |
| • Github | • HTML | • CSS | • Javascript |
| • React | • SQL | • Typescript | • Node.js |

Projects

Workshop On E-Commerce applications

Developed a Google Chrome extension that aggregates product information from multiple e-commerce sources and presents price comparisons.

- Implemented product search, filtering, and sorting mechanisms to help users identify the best purchasing options.
- Enhanced the shopping experience by recommending related products and organizing results based on price and relevance.

RoomieMatch Web Application

Apr 2026 to Jun 2026

Developed a full-stack platform for roommate matching and searching apartments.

- Built responsive UI components and apartment listing pages using React.
- Created RESTful APIs with Node.js and Express for filtering and matching functionality.
- Designed and managed a PostgreSQL database using Prisma.

Languages

Hebrew, Arabic, English

Certifications

FullStack Developer

Apr 2025 to Apr 2026

Ramat Gan

- Hands-on experience with HTML, CSS, JavaScript and React.
- Working with Node.js (express) for back-end development.
- Experience in designing and managing databases (e.g., SQL / No-SQL).
- Collaborative development via GitHub.
